

A VERSATILE COMBINATION SPREADER THAT CAN SPREAD MANY MATERIALS

Lime Spreaders

WLS 2, 4, 5, 8 and 10 Ton Models

Spread
it yourself
and save

Stockpiled (wet or damp) Ag lime
Gypsum
Marl
Fertilizer
Compost
Poultry manure
Sand
Much more

Rugged body and suspension

All WLS spreaders come standard with a smooth riding spring suspension with thick axles for strength. Handles any load...no problem.

Discover the Stoltzfus Difference

The original wet (damp or stockpiled) lime spreader designed for years of heavy use

For farmers who are dissatisfied with light duty spreaders, the Wet Lime Spreader (WLS) is a machine that is built for spreading wet or damp agricultural lime. Unlike a fertilizer spreader, the Wet Lime Spreader has a 24 inch wide conveyor and steep, 53 degree side slopes to prevent material bridging in the hopper.

The lime pile does not need to be kept dry, and can sit in the corner of your field for months until needed. The lime can then be spread when conditions are right instead of waiting in line for the custom applicator to come around.

Standard features

- 2, 4, 5, 8 & 10 ton capacities
- Orchard/Vineyard configurations
- Fertilizer kit for rates down to 125 lbs/acre
- Sawtooth Delivery™ feature
- Spring suspension
- Top driven spinners
- Fill-for-life heavy duty gearbox
- Unibody, fully welded design
- Structural steel frame
- Extra body braces
- 7 gauge steel pan
- 53-degree body sides
- 24" slat style chain
- Telescoping chain tighteners
- Self-aligning idler shaft
- Carbon-steel construction
- Inverted "V" center cover

Ingenious engineering

Our testing found that sides with a 53° slope provide the best combination of material flow and capacity, and our much-copied 4" vertical pan design eliminates bridging.

Unibody construction

Wet Lime Spreaders are actually one solid weldment. That's what makes them so strong. Even the supporting ribs are welded every inch where they attach to the body.

Difference in the details

For example, placing the spinner gearbox or hydraulic motors above the material flow reduces exposure to corrosive materials. Furthermore, it eliminates vibration and isolates the gearbox from the shock of material pounding on the spinner disk.

“My spreader is 30 years old and still spreading. It’s a long lasting spreader, built rugged. I love the spread pattern. Good parts service.”

— Richard, Darlington, MD

“You can easily run 100 tons through a day. I bought it 25 years ago and it has saved me a lot of money.”

— Merv, Union City, PA

“The best piece of equipment I ever bought. 33 years old. It went through a barn fire and it spreads like the day we bought it.”

— Tom, Henderson, MD

The WLS Spreader spreads:

- Stockpiled (wet or damp) Ag lime
- Beet lime
- Gypsum
- Marl
- Fertilizer
- Compost
- Poultry manure
- Grape hulls
- Sand
- Crushed shells
- Cement plant stack dust
- Wood shavings
- Dirt
- Seeds (blended w/ fertilizer)

**Accurate.
Easy to operate.
Great spread pattern.**

Ask us about your most challenging material.

Smoother material flow

Our special Sawtooth Delivery™ feature prevents material surges for low rates of fertilizer.

Heavy duty drive train

Proven PTO drive system and triple speed drives eliminate slipping. Hydraulic drives are standard on the 10 ton model.

Optional shredder

Heavy duty blades chop up any clumps and gives a smoother flow of material onto the spinners.

Optional tail lights

Add lights to increase visibility.

StoltzfusSpreaders.com

All Stoltzfus Wet Lime Spreaders can be configured with hydraulic drives. Your choice of manual controls or Variable Rate Ready (compatible with most controllers).

Upgrade to Variable Rate Technology for better utilization of valuable nutrient inputs.

Popular options

- Self-contained PTO hydraulic drives
- Hydraulic spinners (plug to tractor)
- Hydraulic body chain (plug to tractor)
- Variable Rate Ready (compatible with most controllers)
- Walking-beam suspension
- Flotation tires
- Lights
- Tarp & bow
- Roll top tarp
- Cor-Ten® steel hopper
- 304 Stainless steel hopper
- Brakes
- Shredder (breaks up large clumps before they hit the spinners)
- Special wheel tracks
- Single axle
- 1000 RPM PTO
- Corner pockets (for sideboards)

Optional self contained PTO Hydraulic option with oversized oil tank.

Variable Rate Ready option (compatible with most controllers).
