

2-Ton Spreader

**Rugged enough for lime, precise enough for fertilizer**

Do you want to save money by spreading inexpensive stockpiled lime, but can't find a spreader to do it? For over 30 years, farmers have relied on Stoltzfus to spread difficult materials such as lime. These spreaders are now available to the discriminating grounds keeper.

With a two-ton capacity hopper, you can spread anything from stockpiled lime at 3 tons per acre to granular fertilizer down to 125 lbs. per acre.

## ***What can a Stoltzfus Spreader do for you?***

- **Convenience** - Easily spread stockpiled lime, even if it's been left out for years.
- **Multi-use** - Top dress with sand, gypsum, compost, earth, and other materials.
- **Low-impact** - Single axle protects your turf, reduces compaction, makes towing easier and enhances maneuverability.
- **Precision** - Provides consistent spread patterns, spread fertilizer down to 125 lbs. per acre (with Low Rate kit option).
- **Versatility** - Remove spinners and use as a live bottom cart to deposit sand or earth.
- **Customization** - Options available to control spread pattern.
